

# SHOUT NANO

*Compact, lightweight with integrated panic button.*

-  Panic alarm
-  AES-256
-  Man-down alarm
-  Check-in
-  Up to 40 days

TrackIT

Shout Nano - Personal Tracker

## OVERVIEW

The Shout Nano utilises the Iridium network, offering global coverage. There is also an option to encrypt all position reports to AES-256 standard

It can be used as a hand-held device or can be installed into a vehicle. Reporting intervals can be set from 1 minute upwards and the device also boasts a 'Man Down' facility and 'Check-In' capability

## PANIC ALARM

The unit includes an external panic button which can be found and activated by sliding the protective cover. These panic alerts are immediately displayed on the TrackIT panel and relevant users are automatically informed via text message and / or email

## POWER

The Shout Nano is designed with power efficiency in mind and with its internal Li-Ion battery can send a report every hour for up to 2 months (approx 1500 reports)

## SPECIFICATIONS

Dimensions: 102mm x 56mm x 20mm  
Weight: 184g (6.5 oz)  
Temp: -40°C to +85°C  
Humidity: < 75% RH

## KEY FEATURES

- Low cost tracker and messaging device
- Ultra-low power consumption
- Automatic location reports (>1500 reports)
- Guarded panic alert button
- Data logging
- AES-256 encryption (optional)
- Real-time pole-to-pole coverage
- Internal rechargeable battery using AC adaptor, computer USB port or solar charger
- Integrated motion sensor
- USB interface

## INTEGRATION

The Shout Nano works seamlessly with the TrackIT panel, providing regular reports and has the option to save up to 10,000 reports to be sent at a later date
