SECURE SOLUTIONS FOR SATELLITE, LTE,  
RF, IP NETWORKS AND CLOUD SERVICES

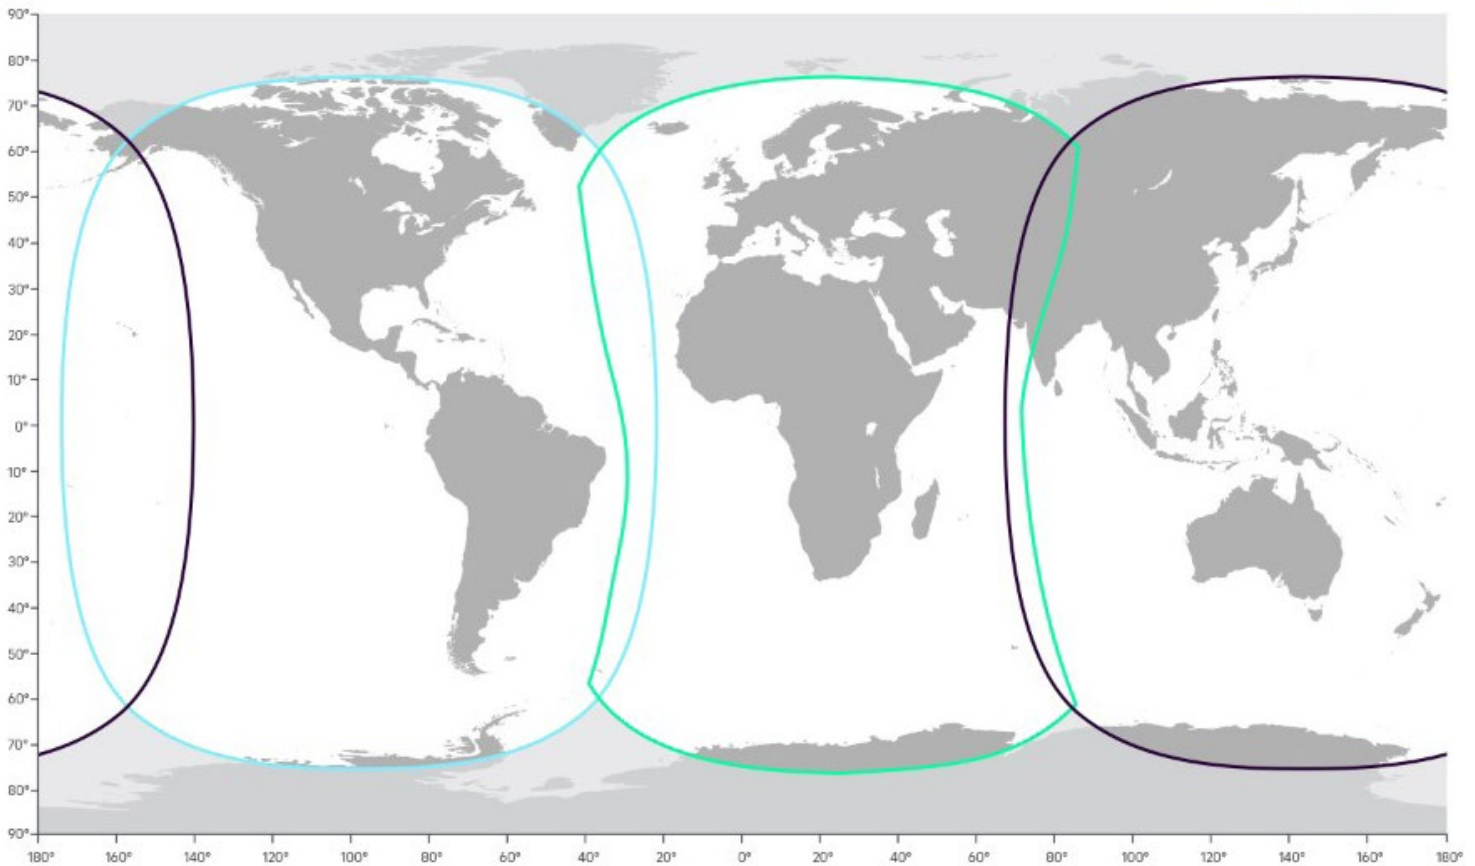

Utilising the most advanced satellite communication network the IsatPhone 2 uses a single global network with 99.9% availability and can be assured of clear voice quality and minimal call drop outs.

## WHERE ISATPHONE 2 MAKES A DIFFERENCE

- **Agriculture** supporting teams working in remote areas where safety is a key concern
- **Aid and NGO** for first responders where reliable lines of communication define how quickly they can reach those in danger.
- **Exploration and leisure** for explorers who need to communicate with basecamp and individuals who are trekking or venturing into areas without reliable terrestrial connectivity
- **Mining, Oil and Gas** for connecting remote workers with control centres improving efficiency and safety
- **Utilities** for crews who frequently work in remote locations

## IsatPhone Coverage

This map is for general information purposes only and no guarantee is given of accuracy or fitness for a particular use. Coverage is subject to change at any time. I-4 F4 coverage prioritises the region north of 44°S, and service may degrade south of this latitude. IsatPhone coverage May 2020.
