SECURE SOLUTIONS FOR SATELLITE, LTE,
RF, IP NETWORKS AND CLOUD SERVICES

Unparalleled reach. In hand, everywhere.

Military-Grade Toughness It may be small, but Iridium Extreme is big on toughness and is built to take a beating. It is ruggedly engineered to support the toughest, highest usage customers of satellite phone communications in harsh conditions, everywhere.

In Touch Iridium Extreme is built with the same reliable voice and data capability that users have come to trust from the only real mobile, real global satellite communications company in the world.

On Track Offering fully integrated services of customisable GPS, Online Tracking and Emergency SOS with notification, it's more than a phone, it is a real mobile, real reliable tracking device with truly global coverage.

Via online portals, Iridium Extreme can provide real time tracking to increase business efficiencies, improve military and emergency response, track critical assets or simply keep family and friends up-to-date.

- Access users through on-demand tracking
- Monitor employees en-route through position updates and geo-fencing
- Use scheduled check-ins to instruct daily missions
- Let family and friends track your location online through social network updates
- Ensure safety of remote personnel
- Disable tracking on demand for stealth operations
- Using Google Maps to send an SMS text message with your exact location coordinates to anyone, from anywhere on the surface of the planet
